

In today's globalized complex world, we all wish that our students/children go beyond academic performance, with **seamless adaptability** to different situations, righteous **decision-making** and **positive attitude**. Program **IGNITE** imparts **Leadership & Life skills** to more than **5000 students** to equip them to face **LIFE** challenges. It is an **adaptive program** where our trainers **'transform'** students and work with them on various aspects of their behaviour, character, attitude and personality apart from inculcating values. We go beyond training and help them achieve their dreams!

IGNITE unearths the student's inner potential and prepares them for **Personal & Professional SUCCESS!**

AREAS OF LEARNING

IGNITE ADVANTAGE

SCHOOL

- Constructive platform for students' overall development
- Focus beyond academic learning
- Better cohesion between students, teachers & parents

STUDENTS

- Individual personality profile
- Fun-based activity sessions
- Peer learning
- Motivation for success
- Positive thinking
- Potential realization
- Situational adaptability

PARENTS

- Parenting workshops & seminars
- Parent-Child bonding
- Total personality development
- Better understanding of children's need

Why IGNITE?

- New and faster technological innovations coupled with faster and cheaper internet connectivity have made the World “Flat” to quote Mr Thomas Friedman. At the same time, face to face interactions and collaborations are becoming fewer and fewer as many rely on technology. In the process, student’s ability to socially mix, handle emotional situations and think creatively and critically has become harder
- Parents/Grandparents involvement with the students at home is much less compared to what it was 15-20 years ago due to various factors including the fast paced lifestyle and environment.
- Media has had a positive as well as negative influence on children/students. Violence, suicides and drugs are on the rise.
- Industry expectations are higher as there is global competition. Moreover, many Indians travel to other countries and are exposed to different behavior and culture for the first time.
- Academic performance alone is not enough as organizations are looking at well-rounded individuals. Backing the academic performance with skills that are necessary to adapt in different situations has become vital and necessary.

How IGNITE works?

IGNITE is an academic year long program working continuously with the students on a month on month basis for all 10 months June through March. The curriculum is integrated into the school’s timetable and customized to the needs of the school. Major highlights are:

- Programs for Classes 1 through 12
- One session per week by Class
- Workshops for Teachers & Parents
- Collaterals & Materials included
- Special projects tailor-made for each school
- Regular assessments & reports to School Management

Methodology & Tools:

IGNITE uses experiential learning methodology to impart various skills. Students enjoy & learn in these sessions at the same time. To make it interesting, the trainers use a variety of tools such as games, puzzles, MIME, debates, story-telling, skits, short videos, anecdotes, etc.

Sample Topics:

There are close to 100+ unique modules/topics which have been handpicked by counselors & Psychologists. Each topic and content of the topic is age appropriate and are customized to a specific audience. Some of the sample topics are given below:

- Decision Making
